IntelliGear: Brand Protection & Takedown

Volon's Intelligear benefits organizations by providing Brand Protection Intelligence which helps organizations to protect its Brand Value, Trust, Integrity and Reputation. The threat actors deploy Phishing, Social Media Campaigns, Setup Rogue Apps, and impersonate executives using leaked credentials to target the Organization's Brand. Volon uses proprietary algorithms to detect phishing attacks, typo-squatting, defacements, rogue apps, credential leaks and brand impersonation in social media

Brand Protection Components

Brand protection services will help Organization monitor unauthorized use / abuse / malicious intent towards Organization brand.

Phishing Monitoring using "Digital Watermarking" to identify Phishing attacks carried out by cloning of original website.

Typosquatting Monitoring using "Propitiatory Algorithm" to detect when domain names (similar to Customer) are registered and used for malicious activity against Customer

Rogue Mobile Apps Monitoring includes continuous automated monitoring of App stores to identify Mobile Apps similar to Customer's official mobile application

Social Media Monitoring to identify brand impersonation attacks towards customer.

Credential Leak Monitoring includes extensive insights regarding leaked customer credentials in third party data breaches along with context i.e. source/actor info and type of data breach.

Defacement monitoring using the proprietary algorithms to monitor, detect and report any changes to the website content.

Takedown (Sites/Apps)

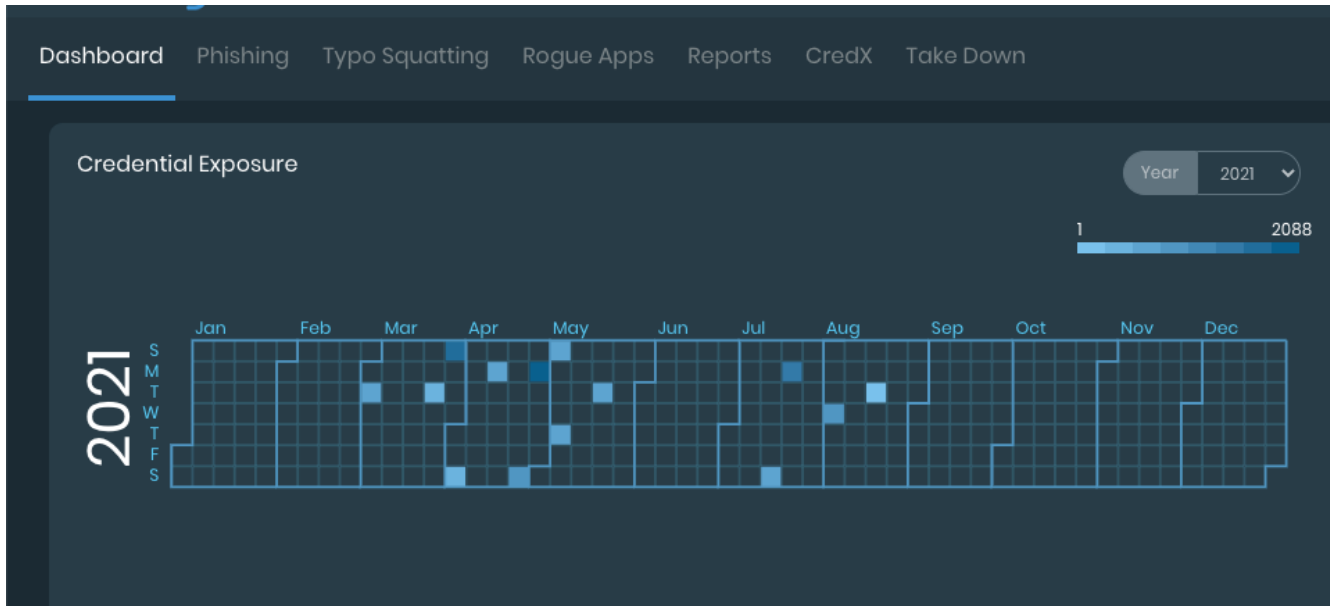

Volon uses their proprietary and DMCA process to carry out the takedowns, this include sending notices to the offending party, hosting providers and registrars with provisions of local and international Laws to demand the takedown on account of impersonation/phishing etc.

Deliverables

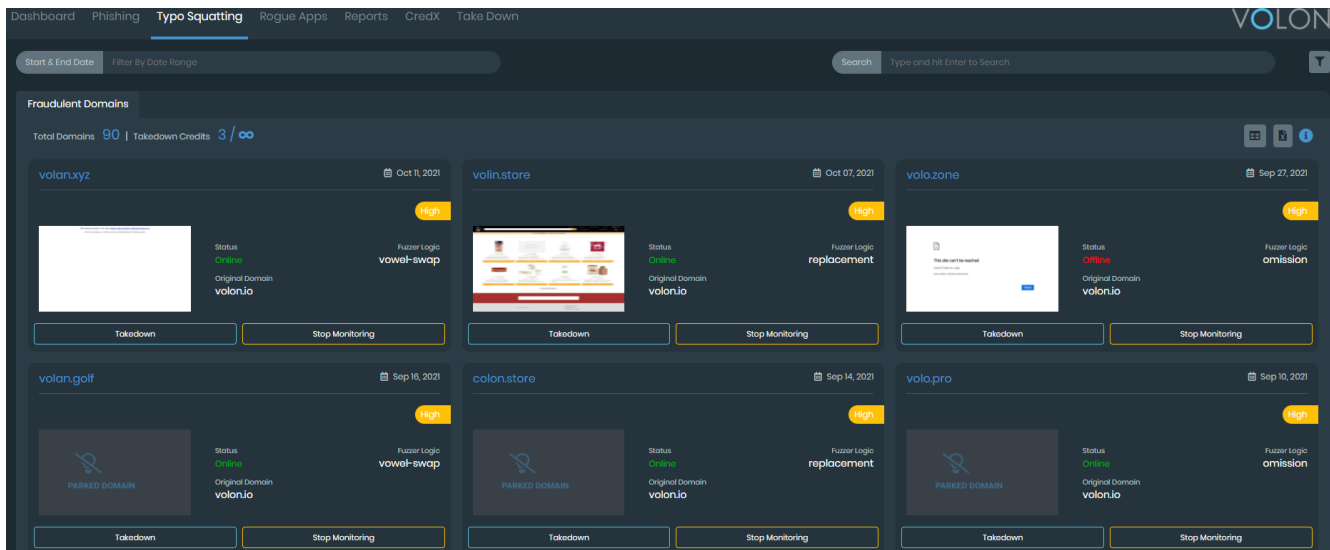

Volon delivers Brand Protection Intelligence via customised customer portal

Portal Dashboard

Dashboard will provide a single view with summary of all threats for Organization, this will include reporting related to Brand monitoring like Phishing, Typo Squatting, Rogue Apps and Credential leaks. Flash reports with “High “relevance is also available for Organization to view directly.
